La costa dei trabocchi: Dove la sabbia incontra la roccia

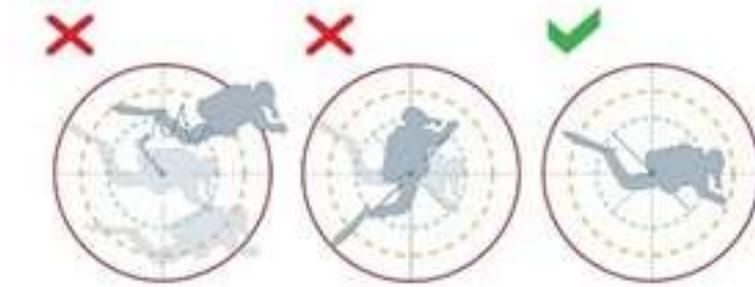

93 m

Google Earth

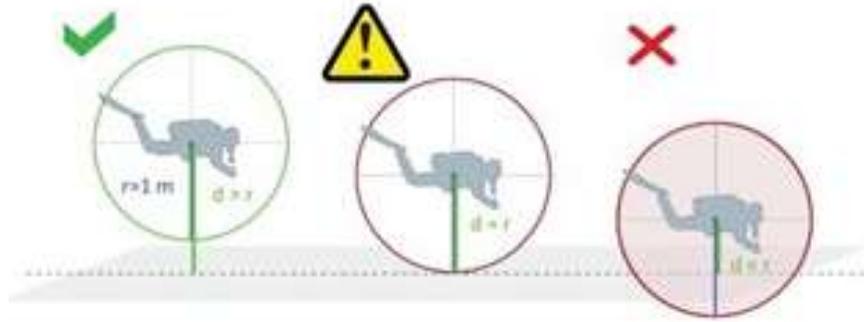

Considerando **SOLO** le vongole, un'area di 10x10 m ha un potere filtrante di 300 litri all'ora!

Good practices

Control your buoyancy, stay flat in the water

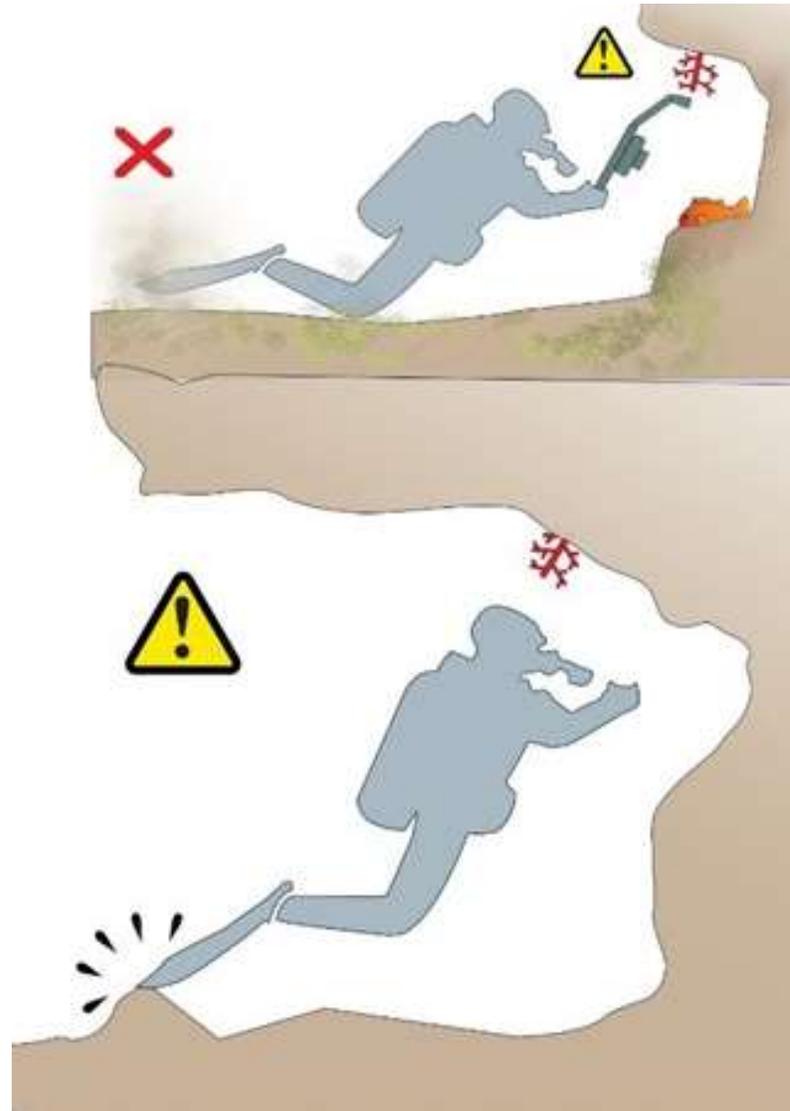

Keep distance from the substrate, do not touch the organisms

No hanging dive gear!

Good practices

Respect the environment when taking photos/videos

Count many times you accidentally touch the substrate and try to reduce next time!

Do not enter narrow passages if your buoyancy is not good enough
